

Milwaukie Bay Park Project: Highlights from Engagement Events

Kick-off event to celebrate in the park and engage the public in the design process (Aug. 2018)

Workshop to discuss and provide feedback on design alternatives (Nov. 2018)

Presentation of final design and community conversation to discuss ideas and next steps (Apr. 2019)

Engaging with residents in small groups and one-to-one brought many more voices into the conversation in 2018 and 2019. Tabling at local events such as concerts, movies and farmers markets engaged hundreds of people. Small group meetings and materials in Spanish helped engage many who were less likely to come to larger public events. Many hundreds of residents engaged online, learning about the project and offering their feedback.
